Re: Docket # PF15-3-000 - Mountain Valley Pipeline
Issues To Include in MVP EIS from 880 Citizens

Dear Ms. Bose:

Enclosed with this letter is the Petition to the U.S. Forest Service requesting that the U.S. Forest Service deny the Mountain Valley Pipeline application to survey pipeline routes in Craig County. Substantive issues and concerns listed in this survey must be addressed in the Environmental Impact Study. Please note that 880 citizens signed this petition although it was circulated for a very short period of time.

Please note that Preserve Craig is submitting three separate petitions to the FERC as part of the Commission's request for Scoping Comments under the Notice of Intent to prepare an EIS for the MVP project. This is the petition originally submitted to the U.S. Forest Service and is the second of three petitions circulated in Craig County since the end of February addressing citizen concerns involving the proposed Mountain Valley Pipeline alternate 110 routes. The first petition submitted was the Petition to the Craig County Board of Supervisors and other Government Officials to request that they oppose the Mountain Valley Pipeline and was submitted electronically on June 10, 2015 (accession #201506115022). The third petition submitted electronically today was the Petition to the FERC to eliminate the 110 routes and include 9 items in the Environmental Impact Study. (accession #201506165190).

Respectfully submitted,

Steering Committee for Preserve Craig, Inc.

Enclosure

Petition to U.S. Forest Service

Reject Mountain Valley Pipeline Survey and Routes in Craig County, Virginia

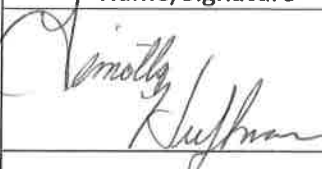

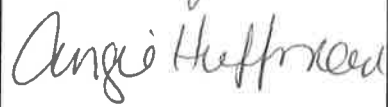

We, the undersigned, formally request that the U.S. Forest Service deny the Mountain Valley Pipeline application to survey pipeline routes in Craig County because the survey is not needed:

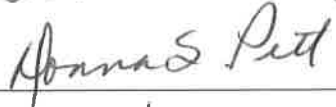

1. WE ALREADY KNOW the US Forest Service denied a similar request for a power line to cross the region in 1995 and the reasons for that decision are as important today as ever.
2. WE ALREADY KNOW the proposed pipeline routes will pass through and disrupt the most important habitats on earth for the Federally Endangered James spinymussel.
3. WE ALREADY KNOW the proposed routes will be visible from the Appalachian Trail and will likely scar the most important views from Dragons Tooth.
4. WE ALREADY KNOW the proposed routes go through areas designated by the USFS as unsuitable for pipelines including Black Bear habitat.
5. WE ALREADY KNOW the proposed routes will further fragment the Wilderness Areas that the Forest Service has invested in protecting.
6. WE ALREADY KNOW the proposed routes cross steep, unstable slopes and unstable karst geology and will affect the quality of both ground water and surface water.
7. WE ALREADY KNOW the proposed routes will remove forest cover that protects critical water resources on both public and private lands.
8. WE ALREADY KNOW the proposed routes will destroy conservation easements, streamside buffers, wildlife habitat restoration projects, and other longstanding conservation efforts created by concerned private citizens in collaboration with state and federal agencies, land conservancies, and other dedicated conservation entities.
9. WE ALREADY KNOW the proposed routes will disturb nesting bald eagles in the Johns Creek watershed, the only resident nesting eagles in Craig County.
10. WE ALREADY KNOW the proposed routes will affect the cultural sense of place for Craig County citizens and the visual scar of the pipeline corridor will affect current and future generations.
